Thanks Brandon
Is NHDES involved in enforcement and is EPA enforcement aware?

Have a good day
Jane

Subject: UNH/Durham

Just a FYI

We are directing Durham/UNH to cease using the Lamprey River as a source of drinking water – both their direct intake and the intake for artificial recharge. Epping WWTF upstream is discharging partially untreated wastewater to the river and may be doing so for several months due to a failure at the plant.

Durham has a couple of wells and the Oyster River they can use.
